"The Sign of The Rose" Coming

Theatregoers everywhere associate the name of George Beban with "The Sign of the Rose." Few players are so closely linked with any play, with the possible exception of David Warfield and "The Return of Peter Grimm."

George Beban's new picture, "The Sign of the Rose" is said also to be his greatest. The story of Pietro Baletti's quest of a rose for his little dead daughter has the simplicity of great art.

"The Sign of the Rose" will be shown at the Torrance Theatre, on Sunday and Monday, October 22, 23

HOOVER NO. ONE COMES IN FOR 2500 BBLs.

Local Banker Is Happy Over Well In Which He Has Interest

J. B. Hines, president of the State Exchange bank of Torrance is as happy as the father of a 12-pound boy and heir, and rightfully so, for an oil well in which he has an interest located in the Signal Hill district "came in" Tuesday at four o'clock and at last accounts was pouring "black gold" into the receiving tanks at the rate of 2,500 barrels a day.

The Hines' "gusher" is called the "Hoover No. 1" and is on the northwest slope of Signal Hill, adjoining the famous "50-50" that has been consistently yielding about 3,000 barrels daily for a period of several months.

The drill crew of the Hoover struck oil sand at a depth of 3,100 feet and on Tuesday when a depth of 3,450 feet had been reached, the expected happened, and the derrick crew, and the adjoining property was deluged with oil.

"Edwards informs us that the oil is of the best grade and that an estimate of 2,500 barrels is a conservative one. The well is on what is known as the Henderson Petroleum Lease and Mr. Henderson now has ten producers on this property.

In referring to the oil situation in and about Torrance Mr. Hines was enthusiastic and said: "From what I have learned and seen and from conferences with practical geologists and oil men I am convinced that Torrance will be producing oil when Signal Hill is forgotten."

"In making this statement I am not detracting from the wonderful productiveness of the latter, but pointing to the fact that the number of wells in the Torrance district will never be so great in number as in the Signal Hill and Santa Fe districts owing to the large parcels of land that are being leased and sold to the various oil companies.

"In the other districts derricks are so close together as they can be constructed while in the Torrance field the land is cut up into not less than three acres and from that to thirty. Therefore it stands to reason the fewer wells that are drilled and produce, the longer the supply of oil will last and I look to see the local field a steady producer over a period of many years, rather than a sensational short-lived field, as is bound to be the case in other crowded districts."

Band Master From Denver, Colo. Here

Tentative steps were taken last week looking toward the formation of a local band by residents of this city, many of whom are trained musicians and who for months have been attempting to form such an organization.

Reviving the band question that has lain dormant since the late Fiesta, when the city suffered from lack of a musical organization, was the visit to Torrance last week of R. L. Parker, of Denver, now a temporary resident of Redondo.

Mr. Parker, who called on several local musicians as well as the secretary of the chamber of commerce, has organized several well known bands throughout the country and having recently decided to make his home in California and hearing of Torrance's needs in this direction has offered his services and guarantees that within a short time to form a musical organization of which the community will be proud.

Details of the terms on which he will undertake this task have been left to subsequent meetings with sponsors of the move here.

CASTEEL IN LONG BEACH Information that W. T. "Billy" Casteel, erstwhile Torrance butcher was seen on the pike in Long Beach one day this week will not surprise any who knew him. To leave here under a cloud and then to brazenly "come back" to our "borders" blowing about the money he has made in oil stocks does not surprise any of us either.

PLENTY OF GAS FOR TORRANCE INDUSTRIES

New 8-Inch Main from Compton to be Laid Within Sixty Days

That within sixty days gas in almost unlimited quantities will be furnished Torrance, will be welcome news to the industries and residents of this city.

T. J. Prothero, general manager of the Southern California Gas company is authority for the statement that within two months the main gas line now running between Long Beach and the Santa Fe Springs wells will be tapped at Compton and an eight-inch main laid between the latter city and Torrance.

The enormous amount of gas used in the industrial plants of Torrance and the fact that new industries are contemplating settling here and are only hesitating owing to the uncertainty of getting gas in sufficient quantities, has evidently had its effect on the gas company, who now realize the necessity of supplying Torrance with all the gas necessary.

The new Compton main will, in the estimation of those who use gas in large quantities, double the present supply and prevent the possibility of any tie-up this winter in the industries already established here or create a shortage for domestic purposes.

The supply of eight-inch pipe to be used in the new line is due to arrive by steamer from the north today and as soon as it can be distributed along the line, the work of laying it will begin.

Woman's Club Visit At Hermosa

About a score of members of the Woman's Club of Torrance attended the meeting of the Hermosa Woman's Club, Monday, October 9th. The program for the afternoon consisted of debates upon three measures to come up for consideration at the coming election.

The first bill taken up was No. 28, Antivivisection. Mrs. Rosalind May Wright of Los Angeles and Dr. Walter P. Brem, President of the County Medical Association for the negative.

The second measure was No. 16, the Chiropractor Bill. Dr. Rutledge of Los Angeles speaking for the affirmative and Dr. Brem for the negative.

The third bill was No. 20, Osteopathy Act. Dr. Harry Forbes for the affirmative and Dr. Brem again speaking for the negative.

Many things new to those present were brought out by both sides and the questions asked of the speakers by those present showed that women are thinking on the questions of the day and seeking to cast their ballot with thought and preparation not as has been remarked by some as "their husbands tell them."

Hermosa Woman's Club thanked the Woman's Club of Torrance for the splendid representation and asked them to come again whenever there was a program in which they were interested.

Woman's Club of Torrance will hold its regular meeting Monday October 16, at 2:30 sharp at the McKinley Inn on Cota avenue. Do not forget it is the presidents' policy to begin promptly on time so if you do not wish to miss any of the good things be sure to be on time.

There will be two speakers present at the meeting Monday to speak on the Water and Power Act. For and against. These gentlemen are from Los Angeles and well posted on their subjects. Gentlemen welcome if they wish to attend.

Is there a person in Torrance, or an owner of a desirable lot that would loan their lot to the Woman's Club, for a certain length of time, so a temporary, portable building could be erected, for their use. If there is such a party write Mrs. Frank Sammons, or phone, 48-W Torrance.

"Auntie Chatter" Is at Palmer's

If you're a Ford owner and haven't yet met Auntie Chatter, who arrived in this city last week, you're surely out of luck and have a surprise in store, for Auntie is actually the "talk of the town." Not that she has done anything indiscreet, not by any means, but she has created such a sensation that Palmer's Service station, opposite the Pacific Electric depot in Torrance is the headquarters for scores of Ford owners anxious to meet this distinguished visitor.

Joking aside, H. R. Gibson, of the firm of Gibson & Stowers, of Long Beach, general distributors for the "Auntie Chatter" Motor Oil for Ford cars, introduced this remarkable lubricating oil to residents of this city to whom he makes the no less remarkable assertion that he guarantees it to remove the objectionable "chatter" from the transmission and brake bands of Fords if used according to directions.

We can say from personal observation, for we too, own and operate extensively a Lizzie—that the oil really works. We were the first to try it in Torrance and while our Ford was not suffering from "chatter" to any great extent, it eliminated what little noise and jerking had been noticeable before and now she runs like a clock.

More than sixty gallons was distributed free by Agent Gibson last week and everyone that was lucky enough to get some is tickled pink with "Auntie Chatter."

TORRANCE NEWS

D. R. Dangler who has resided at the home of his daughter and son, Mr. and Mrs. F. C. Sharp, of Torrance Park, the past nine months, departed for his home in Trumbull, Neb., last Thursday. Mrs. Sharp accompanied him to Los Angeles.
